SUMMARY

Results-driven Unity / C# Game Developer with 3+ years of professional experience in large-scale commercial ecosystems (20M+ downloads) and successful indie publishing (nearly 1M downloads). Expert in multiplayer netcode (Photon Quantum, Netick, Fishnet) and diverse platforms including Mobile, VR, and Telegram TON. Adept at building reusable internal frameworks and modular systems to accelerate development workflows and ensure code scalability.

TECHNICAL SKILLS

Game Engines

Unity 3D/2D

Languages

C# | .NET | TypeScript

WORK EXPERIENCE

Unity Developer — Aug 2022 – Dec 2025

Wolffun Game Pte. Ltd

Developed mobile applications and games on Unity Engine, optimized performance, built gameplay, game UI, creative model editing features, and managed game resources effectively.

PROJECTS

Thetan Arena — Wolffun Game

MOBA / Action | 10M+ Downloads

Global PvP NFT MOBA game combining competitive gameplay and blockchain technology.

- Integrated Thetan SDK (account management, NFT minting & collection) across the game ecosystem, enabling cross-game features
- Secured game integrity via Play Integrity API and obfuscation to prevent fraud

Unity3D | C# | Photon Quantum | Addressables

Google Play | App Store

Thetan Immortal — Wolffun Game

Google Play Best of 2025 | Action / PvP | 100K+ Downloads

PvP archery fighting game with unique character skills. Won Google Play's Best of 2025 — Best Game Made in Vietnam.

- Built Campaign game mode and character skill system
- Integrated with backend to build friendly battle and real-time chat features

Unity3D | C# | Netick | Addressables

Google Play | App Store

Thetan Creator — Wolffun Game

Art & Design | 50K+ Downloads

Application to draw, customize costumes, and publish to Thetan game system. Includes social media features and marketplace.

- Built character creation tools including publishing, saving, and downloading drawing features
- Integrated backend services for user accounts, monetization (IAP/Subscriptions), and social engagement
- Built a centralized resource management system to store, and load character models across Thetan games

Unity3D | C# | Addressables | IAP

Google Play | App Store

Thetan Rivals
Party Royale | 500K+ Downloads | Wolffun Game

Party royale PvP game featuring fun-filled races, knockout challenges, and customizable characters in a vibrant 3D world.

- Built multiplayer game modes using Photon Quantum for real-time PvP synchronization
- Integrated Thetan Creator's artworks into game characters and cosmetics
- Updated and maintained existing features

Unity3D | Photon Quantum | Fishnet | Addressables

Google Play | App Store

City Block Jam
Puzzle | 50K+ Downloads | Wolffun Game

Sliding block puzzle game blending brain-teasing puzzles, color matching, and strategic city-building fun.

- Developed core gameplay mechanics for sliding block puzzles
- Built game feature UI/UX ensuring smooth player experience
- Developed DDA (Dynamic Difficulty Adjustment) library for the entire puzzle game lineup in the ecosystem

Unity3D | C# | Addressables

Google Play | App Store

Otter Loot
Telegram TON | Wolffun Game

P2E mini-game on TON blockchain natively playable on Telegram.

- Built quest system, mini-event features, and referral event features
- Performed maintenance and bug fixes across game features

Unity2D | Telegram APIs | Addressables

Telegram

Dien Bien Phu in the air
