SUMMARY

Highly adaptable **Unity / C# Game Developer** with 3+ years of professional experience in large-scale commercial ecosystems (**20M+ downloads**) and successful indie publishing (**nearly 1M combined downloads**). Adept at multiplayer netcode (Photon Quantum, Netick, Fishnet) and diverse platforms (Mobile, VR, Telegram).

WORK EXPERIENCE

Unity Developer
Aug 2022 – Dec 2025

Wolffun Game Pte. Ltd

Developed mobile applications and games on Unity Engine, optimized performance, built gameplay, game UI, creative model editing features, and managed game resources effectively.

Indie Game Developer
Aug 2020 – Present

Pirex Games

Independently developed multiple mobile games with full responsibility for design, coding, publishing, and live updates. Achieved nearly 1M combined downloads.

PROJECTS

Thetan Arena
20M+ Users

Wolffun Game

Global PvP NFT MOBA game combining competitive gameplay and blockchain technology. Released worldwide with over 20 million players.

- Implemented AntiCheat system using Source Code Obfuscation and Google Integrity APIs to prevent fraud and protect application integrity
- Integrated Thetan SDK across the game ecosystem, enabling cross-game features for 20M+ users

Unity3D | C# | Photon Quantum | Addressables

Google Play | App Store

Thetan Immortal
Google Play Best of 2025

Wolffun Game

PvP archery fighting game with unique character skills. Won Google Play's Best of 2025 — Best Game Made in Vietnam.

- Built Campaign game mode with character skill system, bug fixing, and notification features
- Integrated with backend to build friendly battle and real-time chat features

Unity3D | C# | Netick | Addressables

Google Play | App Store

Thetan Creator
UGC App

Wolffun Game

Application to draw, customize costumes, and publish to Thetan game system. Includes social media features and marketplace.

- Built character creation tools including publishing, saving, and downloading drawing features
- Integrated with backend for login, registration, collections, IAP store, premium subscriptions, and user profile management
- Developed social media features allowing users to post creations and compete on community leaderboards

Unity3D | C# | Addressables | IAP

Google Play | App Store

Thetan Rivals

Wolffun Game

Party royale PvP game featuring fun-filled races, knockout challenges, and customizable characters in a vibrant 3D world.

- Built multiplayer game modes using Photon Quantum for real-time PvP synchronization
- Integrated Thetan Creator's artworks into game characters and cosmetics
- Updated and maintained existing features

Unity3D | C# | Photon Quantum | Fishnet | Addressables | Localization

Google Play | App Store

City Block Jam

Wolffun Game

Sliding block puzzle game blending brain-teasing puzzles, color matching, and strategic city-building fun.

- Designed and implemented core gameplay mechanics for sliding block puzzles
- Built game feature UI/UX ensuring smooth player experience

Unity3D | C# | Addressables

Google Play | App Store

Otter Loot

Telegram TON

Wolffun Game

P2E mini-game on TON blockchain natively playable on Telegram.

- Built quest system, mini-event features, and referral event features
- Performed maintenance and bug fixes across game features

Unity2D | C# | Addressables | Telegram APIs

Archer Master PvP

Meta Horizon Worlds

Wolffun Game

A PvP archery game where two players duel in fast-paced 1v1 matches on Meta's VR platform.

- Built UI Lobby and Shop system with full purchasing flow
- Supported model import pipeline and in-game interaction features
- Integrated character animation system

TypeScript | Horizon Worlds Editor

Meta Horizon

Thetan Resources Manager

Internal Tool

Wolffun Game

Internal project to manage all character resources across the Thetan World ecosystem.

- Built and maintained a centralized repository to store, build, and load Thetan game models

Unity3D | C# | Addressables

Dien Bien Phu in the air

500K+ Downloads

Pirex Games (Indie)

Simulation game of the victory of Dien Bien Phu in the air. Features MiG-21 interceptor, SAM-2 missile defense, and anti-aircraft artillery modes.

- Solo-developed end-to-end: game design, pixel art, programming, and store publishing — achieved 500K+ downloads

Unity2D | C# | IAP | IAA | Localization

Google Play | App Store
